# CYBER CONSULTANCY

## THE GCX APPROACH

GCX understands that we are all operating in a heightened threat environment with household names frequently becoming the next news headline after a security incident. Threats evolve on a daily basis, and it is critical that a reactive and responsive security strategy exists to develop and embed the day-to-day capabilities within the people, process, and technology to appropriately and proactively protect the organisation. To help ensure our customers are fully in control of their security posture, GCX have developed a broad range of Cyber consultancy services.

GCX Cyber Security Consultants deliver a whole range of cyber consultancy services primarily designed around discovering, auditing, hardening, and optimizing a customer's security posture, whilst our consultant's skills can be used for bespoke engagements that we can design and guide you through, we also have a number of key products that include:

### STRATEGY CONSULTING

Delivering structured methodologies to ensure that information and Cyber Security are managed as a business risk with clear linkages to business and technology strategies. We focus on developing clear objectives and outcomes that can be effectively tracked in terms of capability development and maturity via the creation of 'meaningful metrics' that enables you to understand the journey of delivering upon the security strategy.

### PENETRATION TESTING

We offer fully tailored and customized penetration testing services according to our customers' requirements.

We live and breathe cyber security and have on staff some of the industry's best-known experts, that help organizations identify unknown risks and formulate ongoing plans to address them. We handle all types of testing on every conceivable technology possible. We have a firm belief that our work is not done until customers have effectively remediated the gaps we find, which is why we commit to remediation advisory.

- The teams are approved to carry out IT Health CHECK, HMG, NHS, and CREST Pen testing, available on either a per event or a dynamic basis.
- Our security consultants are fully accredited, including CHECK Team Member (CTM), Check Team Leader (CTL-APP, CTL-Inf) OSCE, OSWE, OSCP, CRT, QSA, PA-QSA, IASME, CISSP, CISA, CISM, SANS-GIAC and CEH.

## RED TEAMING

Our Red Team exercise service utilises the expertise of our technical teams to stress test an organizations' operational and process security from an attacker's perspective. This delivers valuable insights and enables proactive mitigation of risk.

Our exercises use the approach of Reconnaissance, Planning, Attack, Report; to expose threats and vulnerabilities, followed-up with in depth recommendations.

## INTERIM SECURITY RESOURCE

Initiated by a Security maturity assessment which is part of the CISO package, GCX cyber delivers CISO functionality and security expertise to companies of all shapes and sizes, providing holistic security expertise to address and remediate the findings of the security maturity assessment. With no training or induction required, our team can hit the ground running and have an immediate impact. We have a full range of security and data privacy expertise, both technical and management focused to address all of your requirements.

## SECURITY AUDITING

Our comprehensive security audits and assessments evaluate the full breadth of the information and cyber domains. Our audit framework is linked to both ISO27000 and NIST. We provide complete clarity over your current security status and assist in formulating forward security planning. We can carry out fully remote assessments looking at your organisation from the lense of an attacker. We can also conduct more thorough assesments working closely with your internal teams to accurately map your current risk exposure.

## WHY CHOOSE GCX?

GCX provide a flexible range of global services that can be as simple as assisting you to deliver and support your own self-build network all the way through to providing a fully managed outsource service. Our solutions are backed by a team of expert consultants who can assist on every step of your data journey, whether it is design concerns like resilience or security, OEM and carrier selection, deployment, and management we are there all the way with approaches that adhere to best practices and are standards led wherever possible.

Our global presence ensures that we can deliver and support whenever, wherever.
