GCX

DATA MADE SECURE

NEXT GENERATION FIREWALL

THE GCX APPROACH

GCX is aware of the transition to a digitised world means that staff have access to all possible solutions and platforms, opening the doors to a wide assortment of risks. The firewall remains an important part of the cyber defence toolkit, but it needs to be smarter than ever to keep up with a moving attack surface. With ever-evolving technology, our dedicated team of security experts can protect your most important assets, 'the crown jewels'.

As security threats become more sophisticated, organisations need to reassess their defences. Cybersecurity is primarily about securing strong boundaries around the network. Now it is a more fluid and changing landscape. Internet-based threats are becoming progressively difficult to manage. Everyone knows that data breaches can lead to loss of data, sales, brand reputation, and customer loyalty. So how would you control the moving target? Start by saving yourself the hassle and risk of in-house or DIY firewall implementation. We can provide you with solutions anywhere in the world with complete service start-up. Our managed firewall security supports you with a dedicated team of security experts and evolving technology to protect your most important assets.

No matter where you do business, we can tailor our support to your needs. Depending on your firewall model, you can choose the next-generation firewall features you want. You are in control of your security policy, we help define it and ensure it is properly implemented and maintained. Our security experts can proactively manage your firewall 24/7 and provide you with detailed reports on system health and attack history. If something goes wrong in the field, our SOC will support you every step of the way.

Industry-leading protection against new and dynamic threats

Full protection against threats with real-time scanning of inbound and outbound web traffic, blocking known and zero-day threats before they reach your network.

Experts on hand

We will manage security policy across your entire network through a single centralized portal.
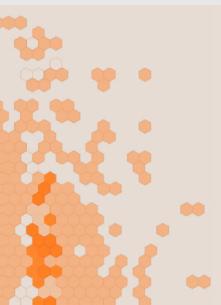

Scalability

We bring you the best technology to help future-proof your investment and maximise your protection. Our service can meet the needs of all sizes of organisation – from those using simple internet links, through to large-scale WAN infrastructures.

Improved productivity

Reduce downtime and prevent unproductive applications from running on your network.

Proactive monitoring

From our SOC we provide a centralised monitoring of your firewall estate, giving you the information, you need to respond proactively.

WHY CHOOSE GCX?

GCX provide a flexible range of global services that can be as simple as assisting you to deliver and support your own self-build network through to providing a fully managed outsource service. Our solutions are backed by a team of expert consultants who can assist on every step of your data journey, whether it is design concerns like resilience or security, OEM and carrier selection, deployment, and management we are there all the way with approaches that adhere to best practices and are standards led wherever possible.

Our global presence ensures that we can deliver and support whenever, wherever.
